

# Project Engineer

White Lioness technologies

We are looking for a new colleague to support our product development team!

## Who we are

White Lioness technologies is a young and innovative company which is 2.5 years old and develops innovative solutions for the designing, engineering, manufacturing and constructing industries. We develop a platform called Packhunt.io which helps our clients to (re)use (technical) information and knowledge. We are active in areas, such as 3D printing, machine learning and information systems.

We are an energised and hardworking team consisting of 14 people. We have in common that we are ambitious and fascinated by technology. We are quite young on average and believe that personal development and learning is important to build the best team in the world. Beside technology we are passionate about organising team events and our daily lunches together.

Are you interested? We welcome you in our office along the IJ river in the city centre of Amsterdam.

## What you will be doing

You will be part of our business, customer care and product development teams which are developing the business around and the technology of a new and exciting product that will revolutionize the (AEC) market. You have a dynamic role that has client-facing elements as well as product development elements. For the client-facing side you will be interacting with our clients on a regular basis to help our clients use and understand the functionalities and features of our product. Furthermore, you are passionate about supporting our clients by providing helpdesk support as part of our helpdesk team. You will be handling the helpdesk requests, solve arising issues and help to flag recurring issues and/or requests. For the product development side you will be responsible for the technical configuration our product based on the client's' feedback and support our account management team with writing manuals, functional designs and providing trainings.

## You

- Are representative and can provide excellent customer service;
- Work well with other developers and those from other teams;
- Are patient, pay attention to detail and don't mind getting into the nitty-gritty;
- Are an excellent communicator and are able to do all verbal and written communication in Dutch as well as English;
- Are a problem solver and have a 'can-do' mentality;
- Want to get even better, like sharing ideas and knowledge and have a passion for new technologies.

## We offer in return:

- a full-time job in a dynamic and friendly start-up environment and a fair salary (dependent on experience) in the city centre of Amsterdam;
- ongoing education - we continuously invest in you to ensure you have everything needed to excel on the job and enhance your skills;
- a friendly, open minded and collaborative team;
- monthly knowledge sharing sessions;
- Start date: as soon as possible depending on your current situation.

## Interested?

Please forward the following to [letstalk@white-lioness.com](mailto:letstalk@white-lioness.com):

- Resume;
- Brief description about yourself, your experience and why you are the right fit;
- Start date: as soon as possible.
